**INTERNATIONAL PRELIMINARY
REPORT ON PATENTABILITY
(SEPARATE SHEET)**

International application No.

PCT/EP2004/005497

- 1) Document **US-A-6188046** discloses (cf. col. 2, line 62 - col. 3, line 21; figures) a kettle assembly comprising all the constructional features of independent claim 1 except the lid comprising a hinge. The attention of the applicant is drawn to the fact that said assembly is considered suitable for soup, even if said purpose is not mentioned in the cited document.
- 2) However, a lid comprising a hinge has been employed for the same purpose, i.e. in order that the compartments can be opened separately, in document **WO-A-00/49924**. It would therefore be obvious to the person skilled in the art, to apply this feature with corresponding effect to the kettle assembly according to document **US-A-6188046**, thus arriving at a kettle assembly according to independent claim 1. The subject-matter of independent claim 1 does not involve therefore an inventive step in the sense of Article 33(3) PCT.
- 3) Dependent claims 2-6 do not appear to contain any additional features which, in combination with the features of any claim to which they refer, meet the requirements of the PCT with respect to inventive step. In particular:
 - Claims 2, 4: see **US-A-6188046**;
 - Claim 5: see **EP-A-63822**, page 3, lines 11-13;
 - Claims 3, 6: obvious constructional details.
- 4) Taking into account the fact that the kettle assembly according to claims 1-6 is considered as not being inventive, the subject-matter of independent process claim 7 is considered as being obvious.
